产品介绍

可再生气泡纸

气泡纸：
又叫气泡垫。具有优良的减震防压、防潮保温的作用。深受人民群众需要

Bubble wrap is also called bubble wrap. It has excellent shock absorption and pressure prevention. Moistureproof and moisturizing function. It meets the needs of the people.

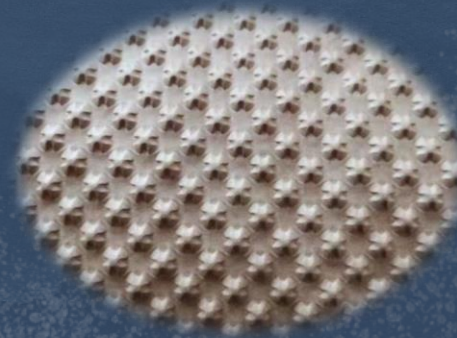

是泡沫和塑料袋的**替代品**
It's an alternative to foam and plastic bags

100%再生气泡纸

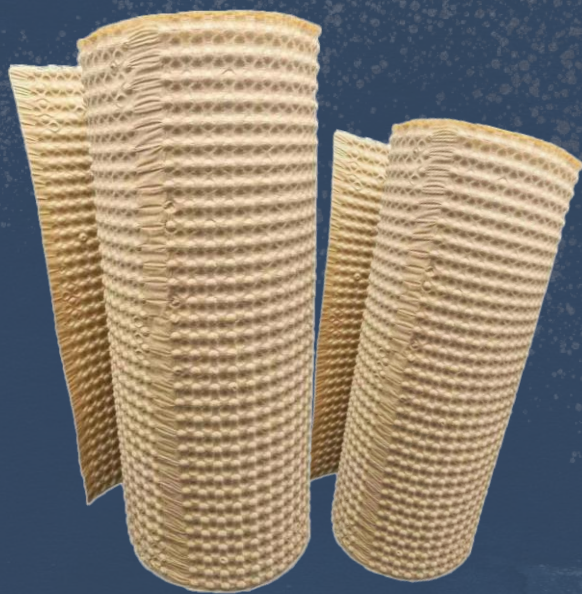

100%再生气泡纸，即废纸回收后经过分类拣选、温水浸涨，被重新打成纸浆后，再次制作而成的产品。由于纸张内含丰富的纤维素，因此具有一定的韧性。当把用过的纸泡在水里，纤维潮湿后会膨胀，紧密度也就相对减弱，这些纤维就可以被分离。就可以通过这样的方法制造出新的纸张。

Recycled bubble wrap.....

100% recycled bubble paper, that is, waste paper is recycled, sorted, swept, soaked in warm water, and repulped. Because the paper is rich in cellulose, it has a certain toughness. When used paper is soaked in water, the fibers expand when they get wet, and their compactness is relatively weak, so the fibers can be separated. New paper can be made in this way.

产品信息说明

这种100%再生纸气泡纸是一种纸卷形式，这使得它非常容易展开和使用，为了达到最佳效果，使用剪刀来削减所需的数量。一旦你的包裹被送到，收件人就可以简单地在他们的家庭回收站中回收他们所有的包装，这意味着没有对环境造成损害。是小型邮购和电子商务企业保护包裹中易碎产品的理想选择。

This 100% recycled bubble wrap is a paperroll form which makes it very easy to unroll and use. For best results, use scissors to cut the required amount. Once your package is delivered, recipients can simply recycle all of their packaging in their home recycling bin, which means no damage to the environment. It is an ideal choice for small mail order and e-commerce enterprises to protect fragile products in packages.

产品信息说明

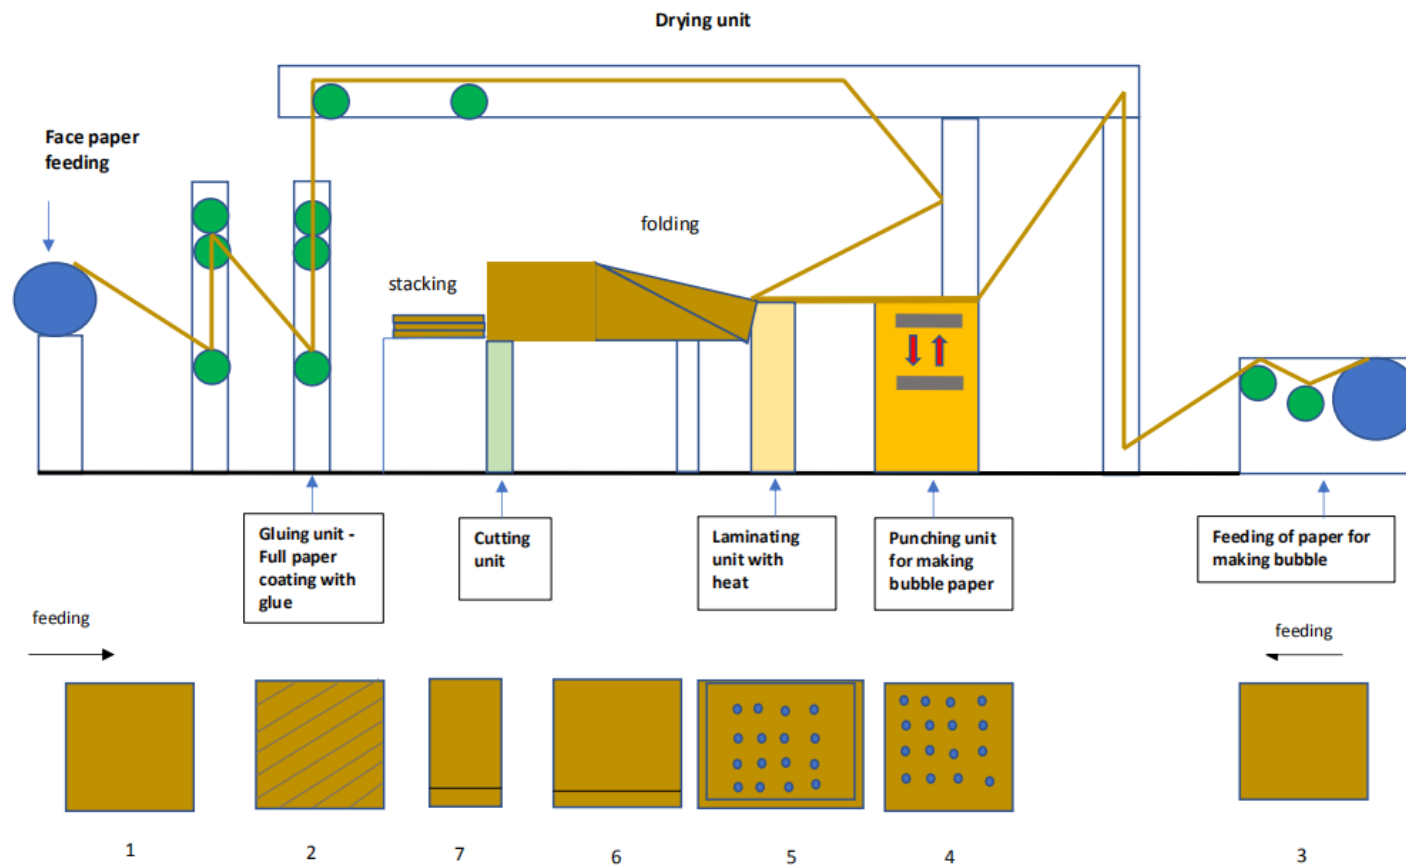

由于我们的气泡纸的再生性能，所以它有轻微的气味。

对于一个购物中心的订单/电子商务业务来说，很难找到一种环保的替代品来替代泡沫包装，以确保易碎的物品完好无损地到达。然而，这种100%再生纸的泡沫包装就能起到这个作用。

Because of the regenerative properties of our bubble system, it has a slight odor. For a shopping mall order/e-commerce business, it is difficult to find an environmentally friendly alternative to foam packaging to ensure that fragile items arrive intact. However, foam packaging made from 100% recycled paper can do just that.

产品基本参数

产品名	气泡纸袋8.6*14英寸棕色加厚双层信封、包裹
样式	内外均为纸质材料 里面是突起的气泡、顶部有胶水、带有波浪型的胶条
商品重量	
颜色	棕色/白色/黄色
材质	信封纸 80-120grm 气泡层 80-90grm 内层纸 40-60grm
尺寸	8.6*14英寸
双面胶条	直条型/波浪形
外形尺寸	310*225mm/ 按客户要求定制
内装尺寸	310*205mm/按客户要求定制

详细产品说明

纤维垫邮件是100%纸制品，是一种多用途的邮件。信封，外面是牛皮纸，里面是柔软的纤维纸，在运送过程中用作缓冲。

光纤填充邮件能有效地减少包装体积，节省存储空间，提高生产率，增加客户满意度，简化包装过程。非常方便。

光纤衬垫收发器:自密封设计，方便可靠，易撕设计，便于徒手开启。适用范围:五金、电子、工业配件、型材、医药、珠宝、医疗器械、摄影机、电子产品、磁盘等;环保型、可回收型。纤维纸是由废弃的书籍、报纸、杂志、纸箱和印刷废料经机械加工而成，不产生任何污染物。

Size:Min.6*9Inch;Max:14.25*19英寸

Fiber mat mail is a 100M paper product, it is a kind of multi - purpose mail. An envelope, brown paper on the outside and soft fibrous paper on the inside, used as a buffer during delivery.

Fiber filled mail can effectively reduce packaging volume, save storage space, improve productivity, increase customer satisfaction, and simplify the packaging process. Very convenient.

Optical fiber gasket transceiver: self-sealing design, convenient, reliable and easy to tear design, easy to open

by hand. Scope of application: hardware electronics, industrial accessories, profiles, medicine, jewelry, medical equipment, cameras, electronic products, disk and other

environmental protection, recyclable type. Fiber paper is made from discarded books, newspapers, magazines, cartons and printing waste materials by mechanical processing, without any pollutants.

详细产品说明

牛皮纸气泡信封

气泡信封为双层结构，外层为牛皮纸,内层为气泡衬里。

牛皮纸的尺寸为80-120gsm

自密封/关闭是安全和方便，同时形成一个防水，安全的包装。

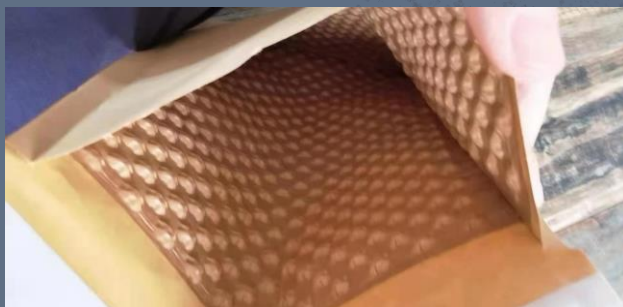

颜色：根据客户要求

印刷尺寸最小: 120* 120毫米口径

500mm * 800mm

可根据客户要求定制。

由100 %回收材料制成。

Kraft Bubble Mailer

The Kraft Bubble Mailer

is a double layer structure, the outer layer is kraft paper and the inner layer is size: 80-120gsm

Selfsealing/closing is safe and convenient while forming a waterproof, secure package.

Color: according to customer requirement

Printing size minimum 120* 120 mm

Made from 100% recycled material.

再生气泡纸

再生材料减少了生产线上能量的消耗，从而对生态环境改变起了重要的作用，减少二氧化碳的排放量。

电子商务平台的迅猛发展带来了快递业务的大幅增长，为纸包装行业带来了较大的发展机遇。加之国家政策对环保，可循环利用方向的侧重，未来纸包装在快递行业的发展空间值得期待！

Recycled materials reduce energy consumption on the production line ,thus playing an important role in ecological environment change, reducing carbon dioxide emission. The rapid development of e-commerce pinghe has brought a substantial growth of express delivery business, which has brought great development opportunities for the paper packaging industry .In addition, the national policy on environmental protection, recyclable direction of the future paper packaging in the express industry development space is worth looking forward to!

Thank you
